EDUCATION

Stanford University Stanford, CA
Master of Computer Science, AI track Expected June 2027
Coursework: Deep Learning, AI Principles and Techniques, Computer Graphics, Natural Language Processing

Rice University Houston, TX
Bachelor in Computer Science & Visual Arts | GPA: 3.83/4.00 Cum Laude Aug 2020 - May 2024
Coursework: Algorithmic Thinking & Data Structures, Advanced Object-oriented Programming, Advanced Computer Graphics, Probability & Statistics, Operating Systems & Concurrent Programming, Computer Security

PROFESSIONAL EXPERIENCE

Shanghai Bilibili Technology Co. Shanghai, China
Software Engineer, iOS Platform July 2024 - Aug 2025

- Developed a scalable **Python-based CLI toolchain** and managed a **modular architecture** to streamline complex **Bazel** build commands and enable independent module upgrades, enhancing productivity for 200+ engineers.
- Engineered a **Swift fastbuild system** and cut redundant third-party compilation using **Google Bazel**, **remote caching**, and customized **Xcode** project generation workflows, slashing build times **by over 30 minutes** (from 4060s to ~2000s) and project generation time by **76%** (1300s to 300s) for large-scale clean builds.
- Automated **CI/CD pipelines** and enabled build vendor mode to optimize storage and consistency using **GitLab CI** and **Bazel**, ensuring **99% deployment reliability** across engineering teams and reducing local disk usage by **30%**.

Riot Platforms, Inc. Texas, USA
Full-stack Software Engineer Intern May 2024 - July 2024

- Engineered 10+ critical workflows and real-time control center widgets for crypto mining operations using **AngularJS**, **C#**, and **RESTful APIs**, scaling the capabilities of the company's core platform infrastructure.
- Developed a server-less **text-to-SQL AI chatbot** with agentic workflow for natural language SQL database analytics using **Amazon Bedrock**, **Snowflake**, and **AWS Lambda**, optimizing warehouse compute and parameterized queries to decrease response times by **83%** (from 6 minutes to 1 minute).

PROJECT EXPERIENCE

Chief Design Officer for Owlracle NICE, TX
Full-stack Software Development May 2023 - Sept 2023

- Engineered an AI course planning web app using **NextJS**, **TypeScript**, and **VectorDB**, used by **1,200+ students**.
- Developed a **Retrieval-Augmented Generation (RAG)** system to accurately retrieve database information using **prompt engineering**, and the **OpenAI GPT-3.5 API**, delivering precise answers to complex queries.
- Designed an accessible chat UI with **NextJS** and **CSS**, ensuring seamless user-to-system communication.

Leading Software Engineer for Ora Stanford, CA
XR Hackathon Grand Prize Winner Nov 2023

- Engineered an **AR app** for emergency firefighter hand-gesture communication using **C#**, **Unity**, and **Ultraleap**.
- Awarded Grand Prize**,** Best Ultraleap**,** XR Trailblazer awards at Stanford's largest XR hackathon against 20+ teams.

RESEARCH EXPERIENCE

China University of Geosciences Beijing, Remote
Research Assistant April 2024 - Oct 2024

- Developed a virtual teacher for autism patient guidance with **Safe Reinforcement Learning (RL)** approach and **DDPG algorithm** using **Python**, **TensorFlow**, and **Matlab**, showing a **20%** improvement over traditional methods.
- Published peer-reviewed findings at **26th IEEE ICIT** with recognition for innovative healthcare applications.

SKILLS

AI related: Machine Learning, Deep Learning, Reinforcement Learning, TensorFlow, PyTorch, LLM
Languages: Python, Java, JavaScript, HTML, CSS, C#, Objective-C, TypeScript, Swift, MySQL, PHP, C++, MATLAB
Tools & frameworks: React, SwiftUI, NextJS, AngularJs, Node.js, Godot, Unity, Redux, MongoDB, Firebase
